Government Services Integrated Process Team (Government Services IPT) delivers innovative and cost-effective solutions to our clients. Our team of talented, registered, experienced professionals delivers multi-disciplinary consulting and design services to federal, state, and local government agencies and the private sector.

Our team has extensive experience in a range of specialized planning areas:

- Asset Evaluations (AE)
- Basic Facility Requirements (BFR)
- Capital Improvement Plans
- DD Form 1391s
- Design and Planning Charrettes
- Design Guidelines
- Encroachment Studies
- Execution Plans
- Facilitation
- Facility Siting
- Feasibility Studies
- Funding Documentation

- Installation Planning
- Land-use Planning
- Landscape Architecture
- Needs Assessments
- Master Plans
- Programming
- Project Documentation
- Real Estate Transactions
- Space Utilization Studies
- Site Analysis
- Site Selection
- Visioning
- Visual Impact Assessments

Each of these areas of expertise is enhanced by our proven skills and experience in graphic design, information technology, Geographic Information Systems, facilitation, research, policy analysis, technical writing and editing.

Government Services IPT has a strong history of performance and success through process innovation. Government Services IPT offers individualized service and

attention to each client with the depth, talent, and expertise of a large firm, and the tailored and streamlined response of a highly focused smaller firm. Government Services IPT staff have over a decade of specialized experience yielding proven practical solutions.

Our innovative and collaborative approach provides practical solutions. Our process is distinguished by service, individualized attention and a commitment to active communication with our clients before, during, and after a project. As a foundation for our success, we:

- Listen to our clients and their stakeholders
- Collaborate using diverse teams
- Communicate continuously and effectively
- Deliver solutions on-time and within budget
