

FEDERAL SERVICES

KCI's federal services practice provides a team of engineers, scientists, landscape architects, planners, surveyors, and construction professionals to support the ongoing mission of the civilian, military, and intelligence agencies of the federal government. Our team delivers quality responsive solutions to design and construction challenges and is cleared to work in the classified environment. KCI provides an integrated approach to automating design, drafting, documentation, and presentation, which minimizes costs, facilitates coordination across disciplines, and expedites the production of high quality deliverables.
