

MARSTEL-DAY PRESENTS:

ECLIPSE

(Energy, Conservation & Land-use Innovation Planning for a Sustainable Environment)

Our **ECLIPSE** program assists public and private agencies and institutions with large land holdings by developing integrated land use plans and community interaction processes to help sustain their missions and manage encroachment in challenging political, environmental and market conditions.

Our **ECLIPSE** program covers:

- Climate Adaptation Plans
- Encroachment Management Plans
- Sustainable, Long –Term Environmental and Energy Planning
- Regional Sustainability Initiatives
- Issues Identification and Stakeholder Support
- Internal and External Land Use Assessments
- Long-Range, Landscape-Scale Conservation Assessments and Plans

We provide you with the **CLUES** (Climate, Land Use and Environmental Planning Solutions) you need to resolve your Agency-wide needs. A comprehensive approach to planning, development, and sustainment of your large institutional land-holdings, such as:

- Military installations and military complexes
- Parks, forests and wildlife refuges
- Research and development complexes
- Universities and colleges

Our clients include:

Defense Security Cooperation Agency
Department of Homeland Security (Science and Technology Directorate)
DoD, Office of the Secretary of Defense (Policy)
DoD, Office of the Secretary of Defense (Installations & Environment)
