

PLANNING ARCHITECTURE TECHNOLOGY

Planning

"The Onyx Group worked well with a demanding customer. All products provided met or exceeded the customer's expectations. Firm is fully capable of more difficult master planning work."

—Chief Master Planning Division, USACE Savannah

"I will tell you again that every time I read this, I learn something new and I think it will have the same effect on our garrison staffs..."

—Project Manager, IMCOM SE

Architecture

"The design prepared by Onyx was based on Building Information Modeling (BIM), which provided a level of quality beyond what was required in the contract."

— Project Manager, US Navy

The final primary town plan was of exceptionally high quality...the firm took full responsibility for the entire effort and showed a high degree of integrity in the technical resolution of issues...The Onyx Group's hard work and commitment kept progress moving forward without unnecessary delay...your team significantly contributed to the mission of the Marine Corps at Twentynine Palms."

—Commander, US Navy

Technology

"Despite the complexity of the project, and the challenges that arose, the Government received all the services and products as requested...Their knowledge of the subject matter helped make the project run smoothly...they communicated ideas and explained difficult concepts very well."

—Commander, NAVFAC Pacific
