

Deliver Mission Success.

At URS, our commitment to putting the mission first is paramount. With customers who include most federal departments and major agencies, we believe that every opportunity comes with a collective responsibility to perform. Whether it's planning and design, programming and construction, operations and maintenance, installation and logistics management, technical services, nuclear and chemical demilitarization, or flight services and training, we deliver successfully.

URS has current capacity on over 100 contracts with the Army, Navy, Air Force, Corps of Engineers, Guard and Reserves, Coast Guard, and GSA. With a total ceiling value over \$4B for these contracts, you have access to us for all your mission support needs.

Our corporate emphasis on sound project management combined with the breadth and depth of our resources ensures professional and personal attention to your mission-essential projects. Regardless of project size, location, or discipline, when excellence matters, URS delivers.

The final version of the published planning document was well received by the military staff operating the base. All are confident that the long-term needs of this enduring base can be met to accomplish the intended mission. The management team played an active role from start to finish with this project. All documentation received was presented in a very professional manner, evident of the attention to detail exercised with well-managed guidance from the principal level. The contractor has clearly demonstrated the quality control and quality assurance concepts of pride in ownership.
